We Build Statements.

The imagination has no boundaries. And neither do our artisans at Gist Specialties. Let us help you create a bold statement and rise above the ordinary. At Gist Specialties if you can dream it, we can build it. We proudly turn conceptual fantasies into artistic reality.

No project is too big or too small. We use a myriad of materials to create custom, themed fabrications for our one-of-a-kind projects. No detail is too intricate. No scale too grand. We pride ourselves on fulfilling our customers' widest expectations and go to great lengths to bring their unique visions to life.

We specialize in:

Architectural / Structural

Metal Fabrication

LINE-X Spray Foam and Hard Coating

Fiberglass Fabrication

Automotive and Faux Painting

CNC Cutting

Sculpting

Millwork

Fine Art Painting

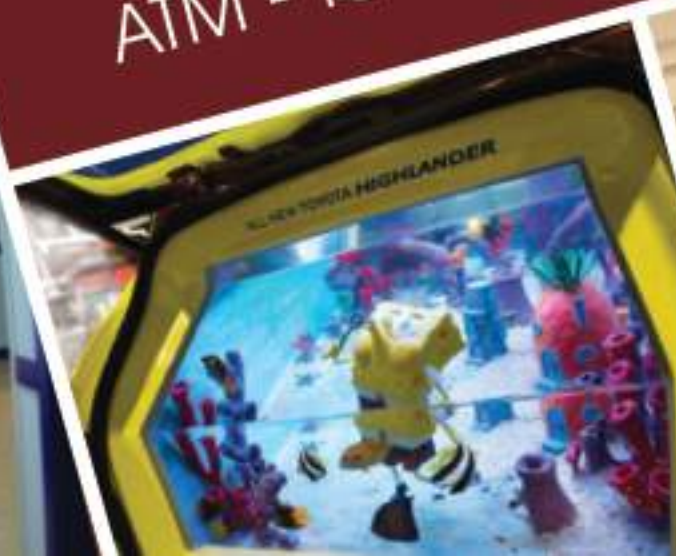

Encore Hotel Spa

Custom molds and castings were created to produce the large urns and statues that decorate the spa of the Encore Hotel. Three large Buddha statues were carved from foam, hard coated and then painted in a metallic gold finish. In addition to the statuary and decorative urns, we also created custom masonry chaise lounges.

ATM - Tanked Television Show

We have produced numerous fish tank surrounds for the hit reality show, Tanked. We have sculpted unique embellishments, used metal forming, incorporated glass and fiberglass along with traditional millwork to bring these creative visions to life. The structures are not only beautiful, but they strong, durable and leak proof in order to house these heavy, glass fish tanks.

Some of the unique designs included: a front end of a truck surround for Shaquille O'Neal; an oversized, wooden stand with carved pets for PetCo.; a coffee cup and donut for Dunkin' Donuts; a "gumball machine;" along with many others.

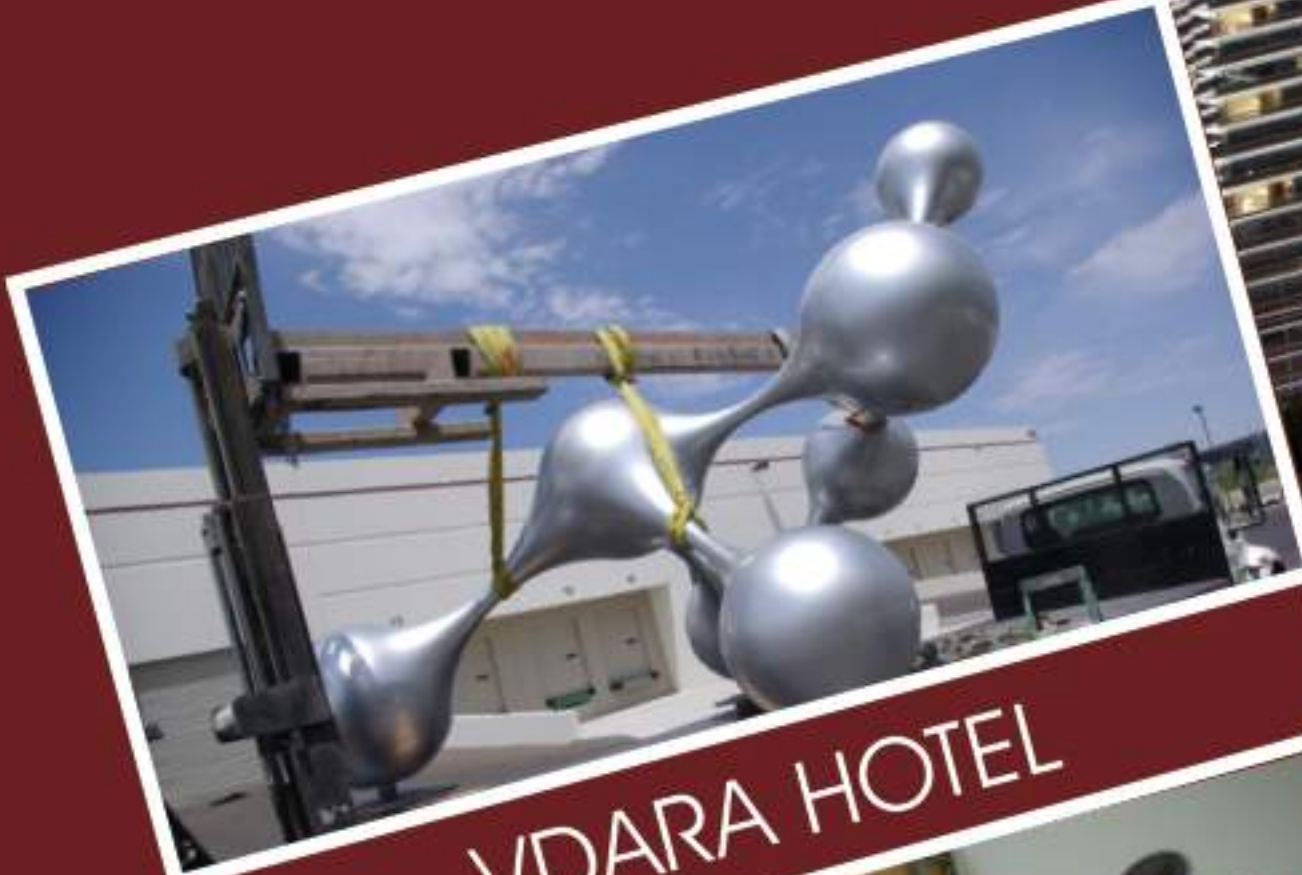

We Build STATEMENTS.

We brought our client's vision of metal sculpted butterflies to life and then coordinated with expert installers to meticulously inlay all of the exotic, hand-cut tiles. The results were beautiful, weather resistant art pieces that decorate the exterior of the Wynn and Encore Hotels.

VDARA HOTEL

This beautiful orb sculpture, The Seven Continents, decorates the outside of the Vdara Hotel. We created sphere molds and constructed risers to maintain accurate orientations. We finished this art piece with automotive finish for lasting color and durability.

Sushi Samba Miami

We fabricated a seamless, fiberglass bar for Sushi Samba in Miami, Florida. The large curved bar was created as one piece arching around the center of the restaurant.

Sushi Samba Restaurant
Venetian Hotel & Casino

The ornate arches that cover the Sushi Samba Restaurant in the Venetian Hotel were laid out in its entirety across our warehouse for accuracy. The unique shapes were produced in fiberglass with rigid edging to maintain the shape and design throughout. In addition to a 50% cost savings compared to other supplier estimates, we were able to maximize table count and traffic flow to accommodate more dining guests.

Wynn Macau Hotel Lobby

We created a 90' wide, intricately carved Chinese Zodiac dome that swirled open to reveal an LED screen that showcased various light shows for the Wynn Macau Hotel Lobby. Each section was created as panels. They were produced on CNC and then finished with hand detailing.

Hard Rock Sports Book

Each row of the Sports Book at the Hard Rock Hotel was created in fiberglass that seamlessly curved throughout.

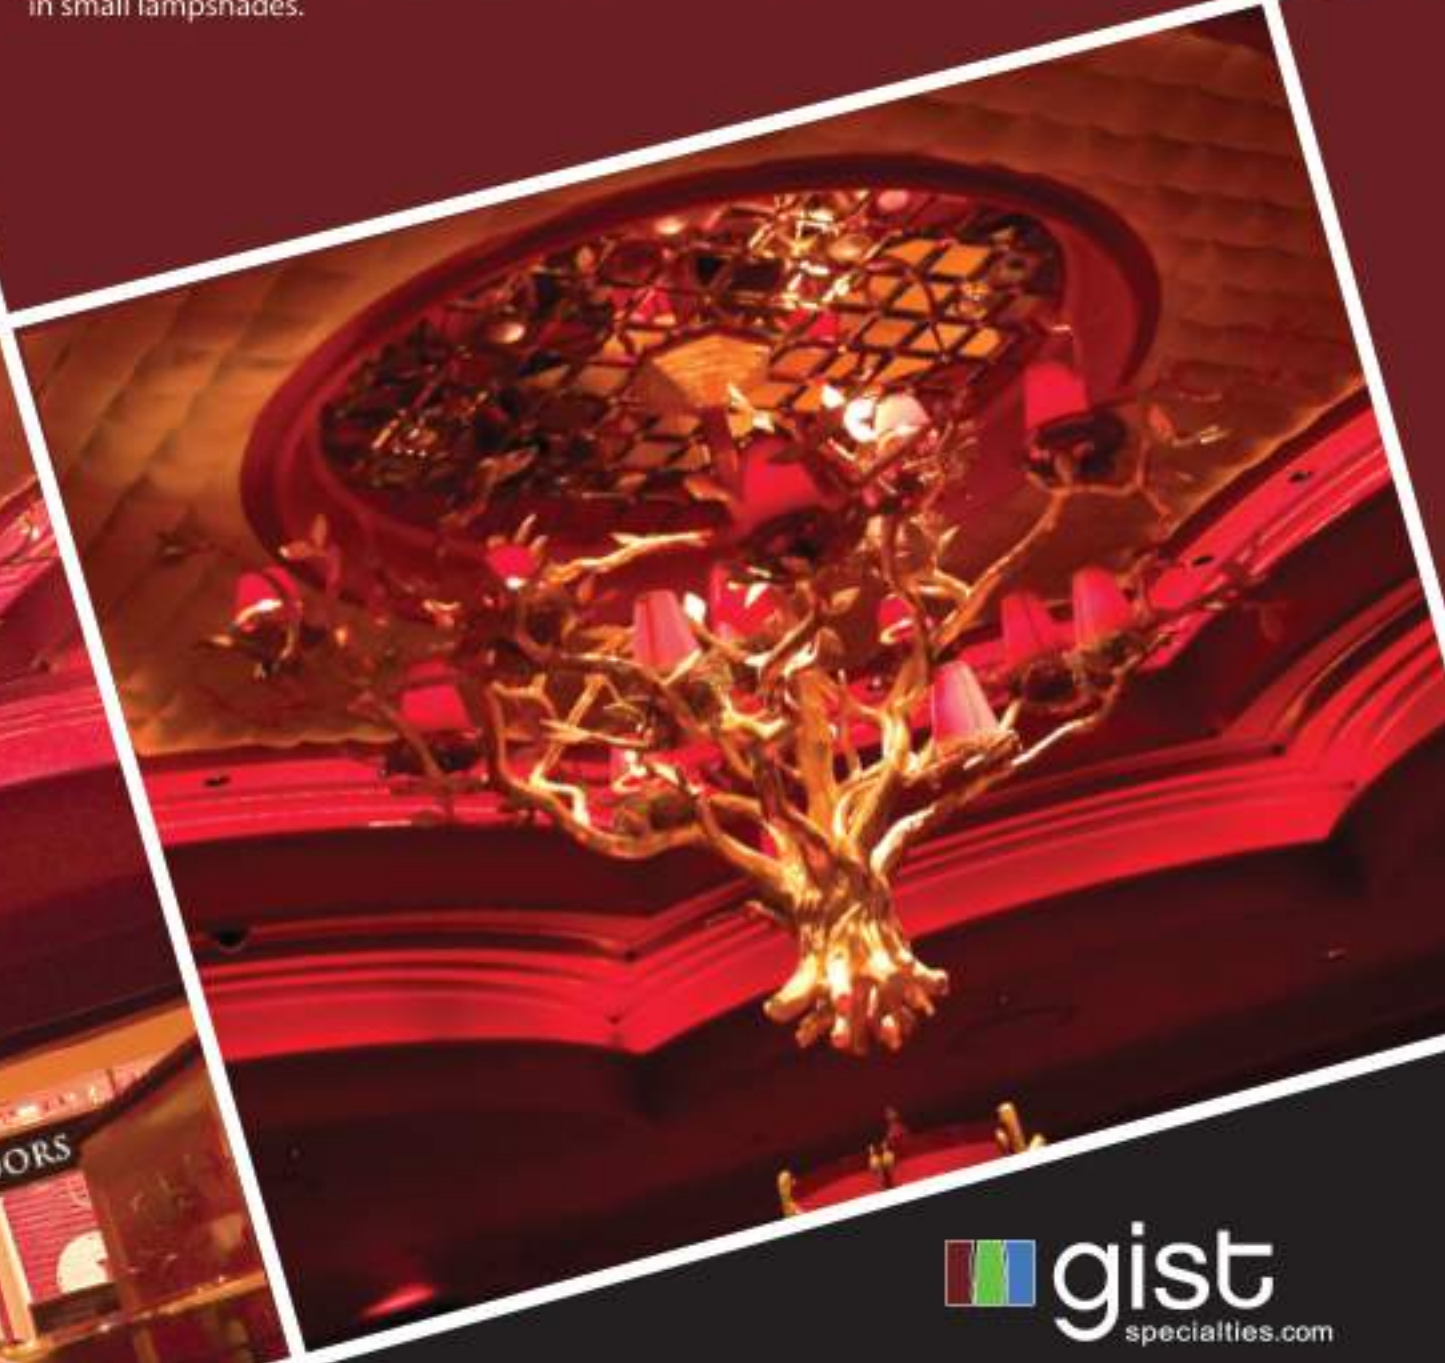

Daphne Tree - Wynn / Encore

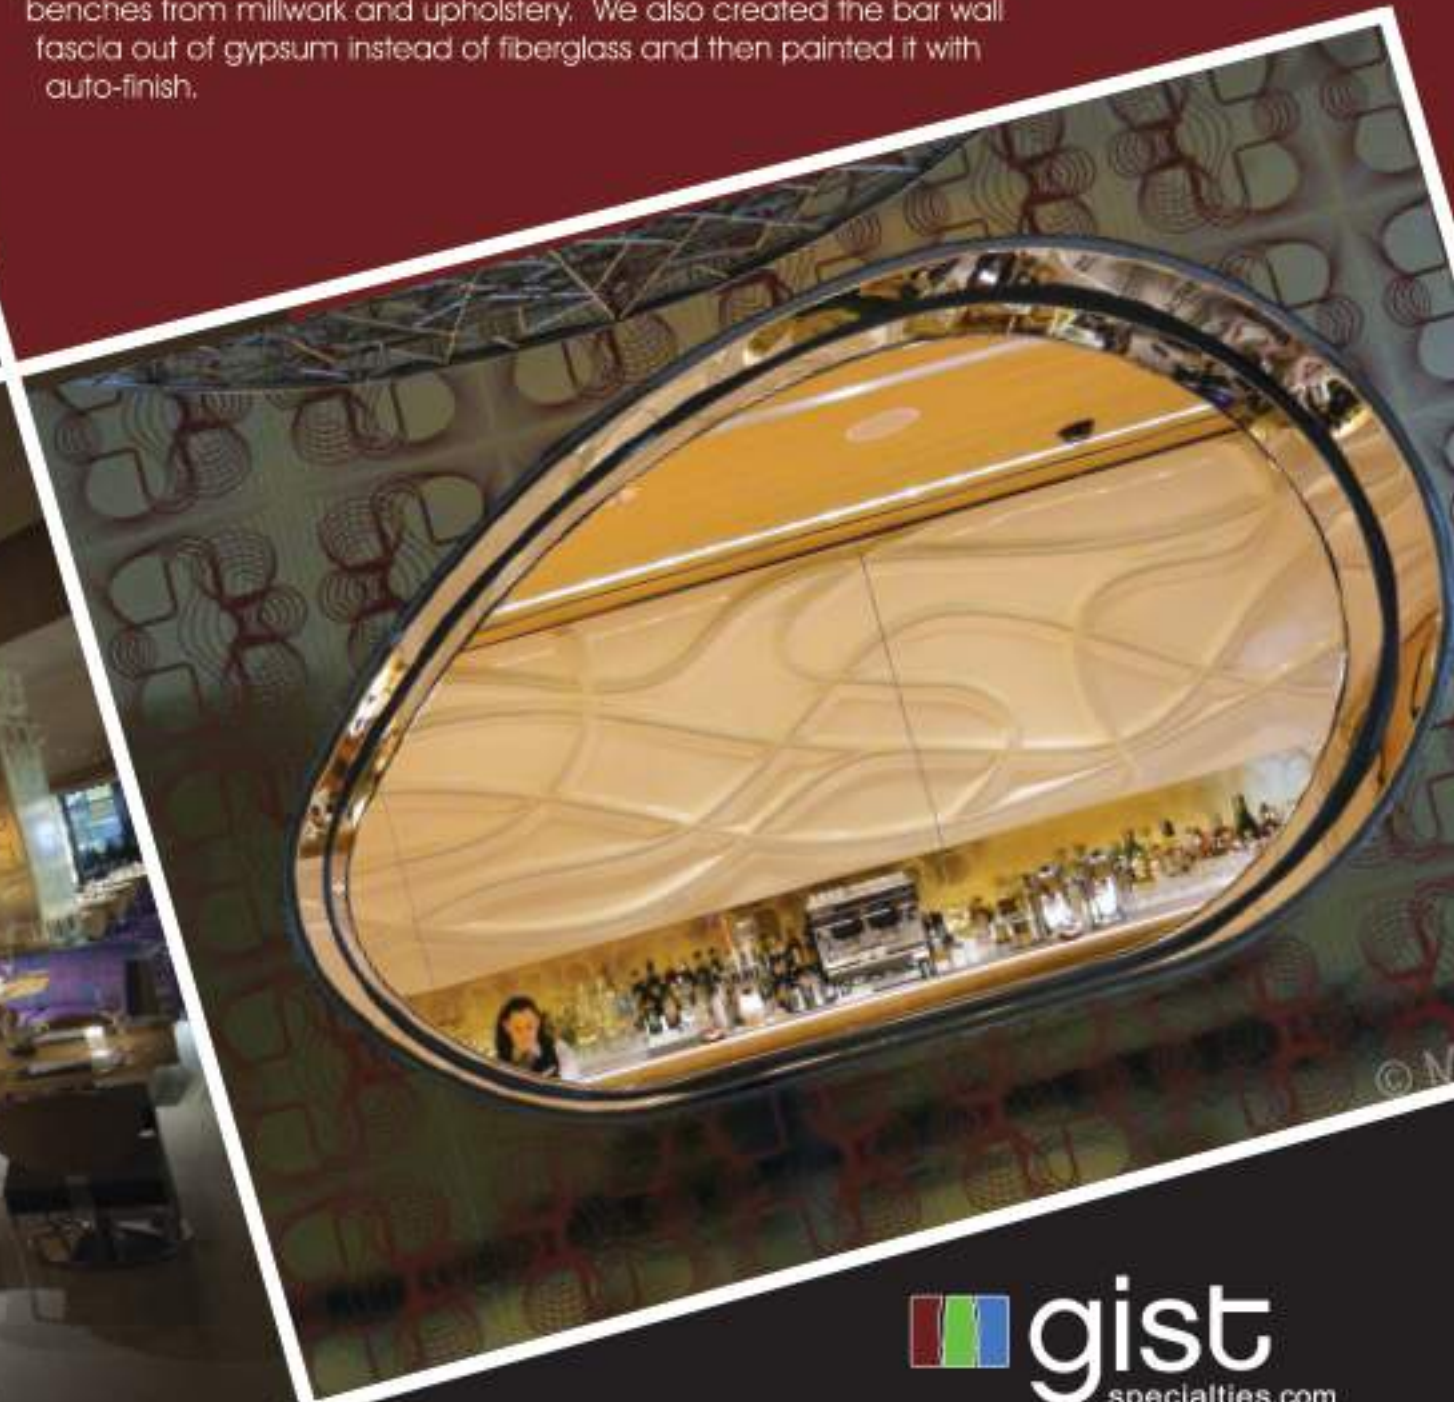

We created this mythical tree representing Daphne's escape from Apollo for the Encore hotel bar. Daphne was carved out of foam, hard coated and then gold leafed. The top of tree is an elaborate chandelier with branches covered in small lampshades.

Silk Road Restaurant
Vdara Hotel

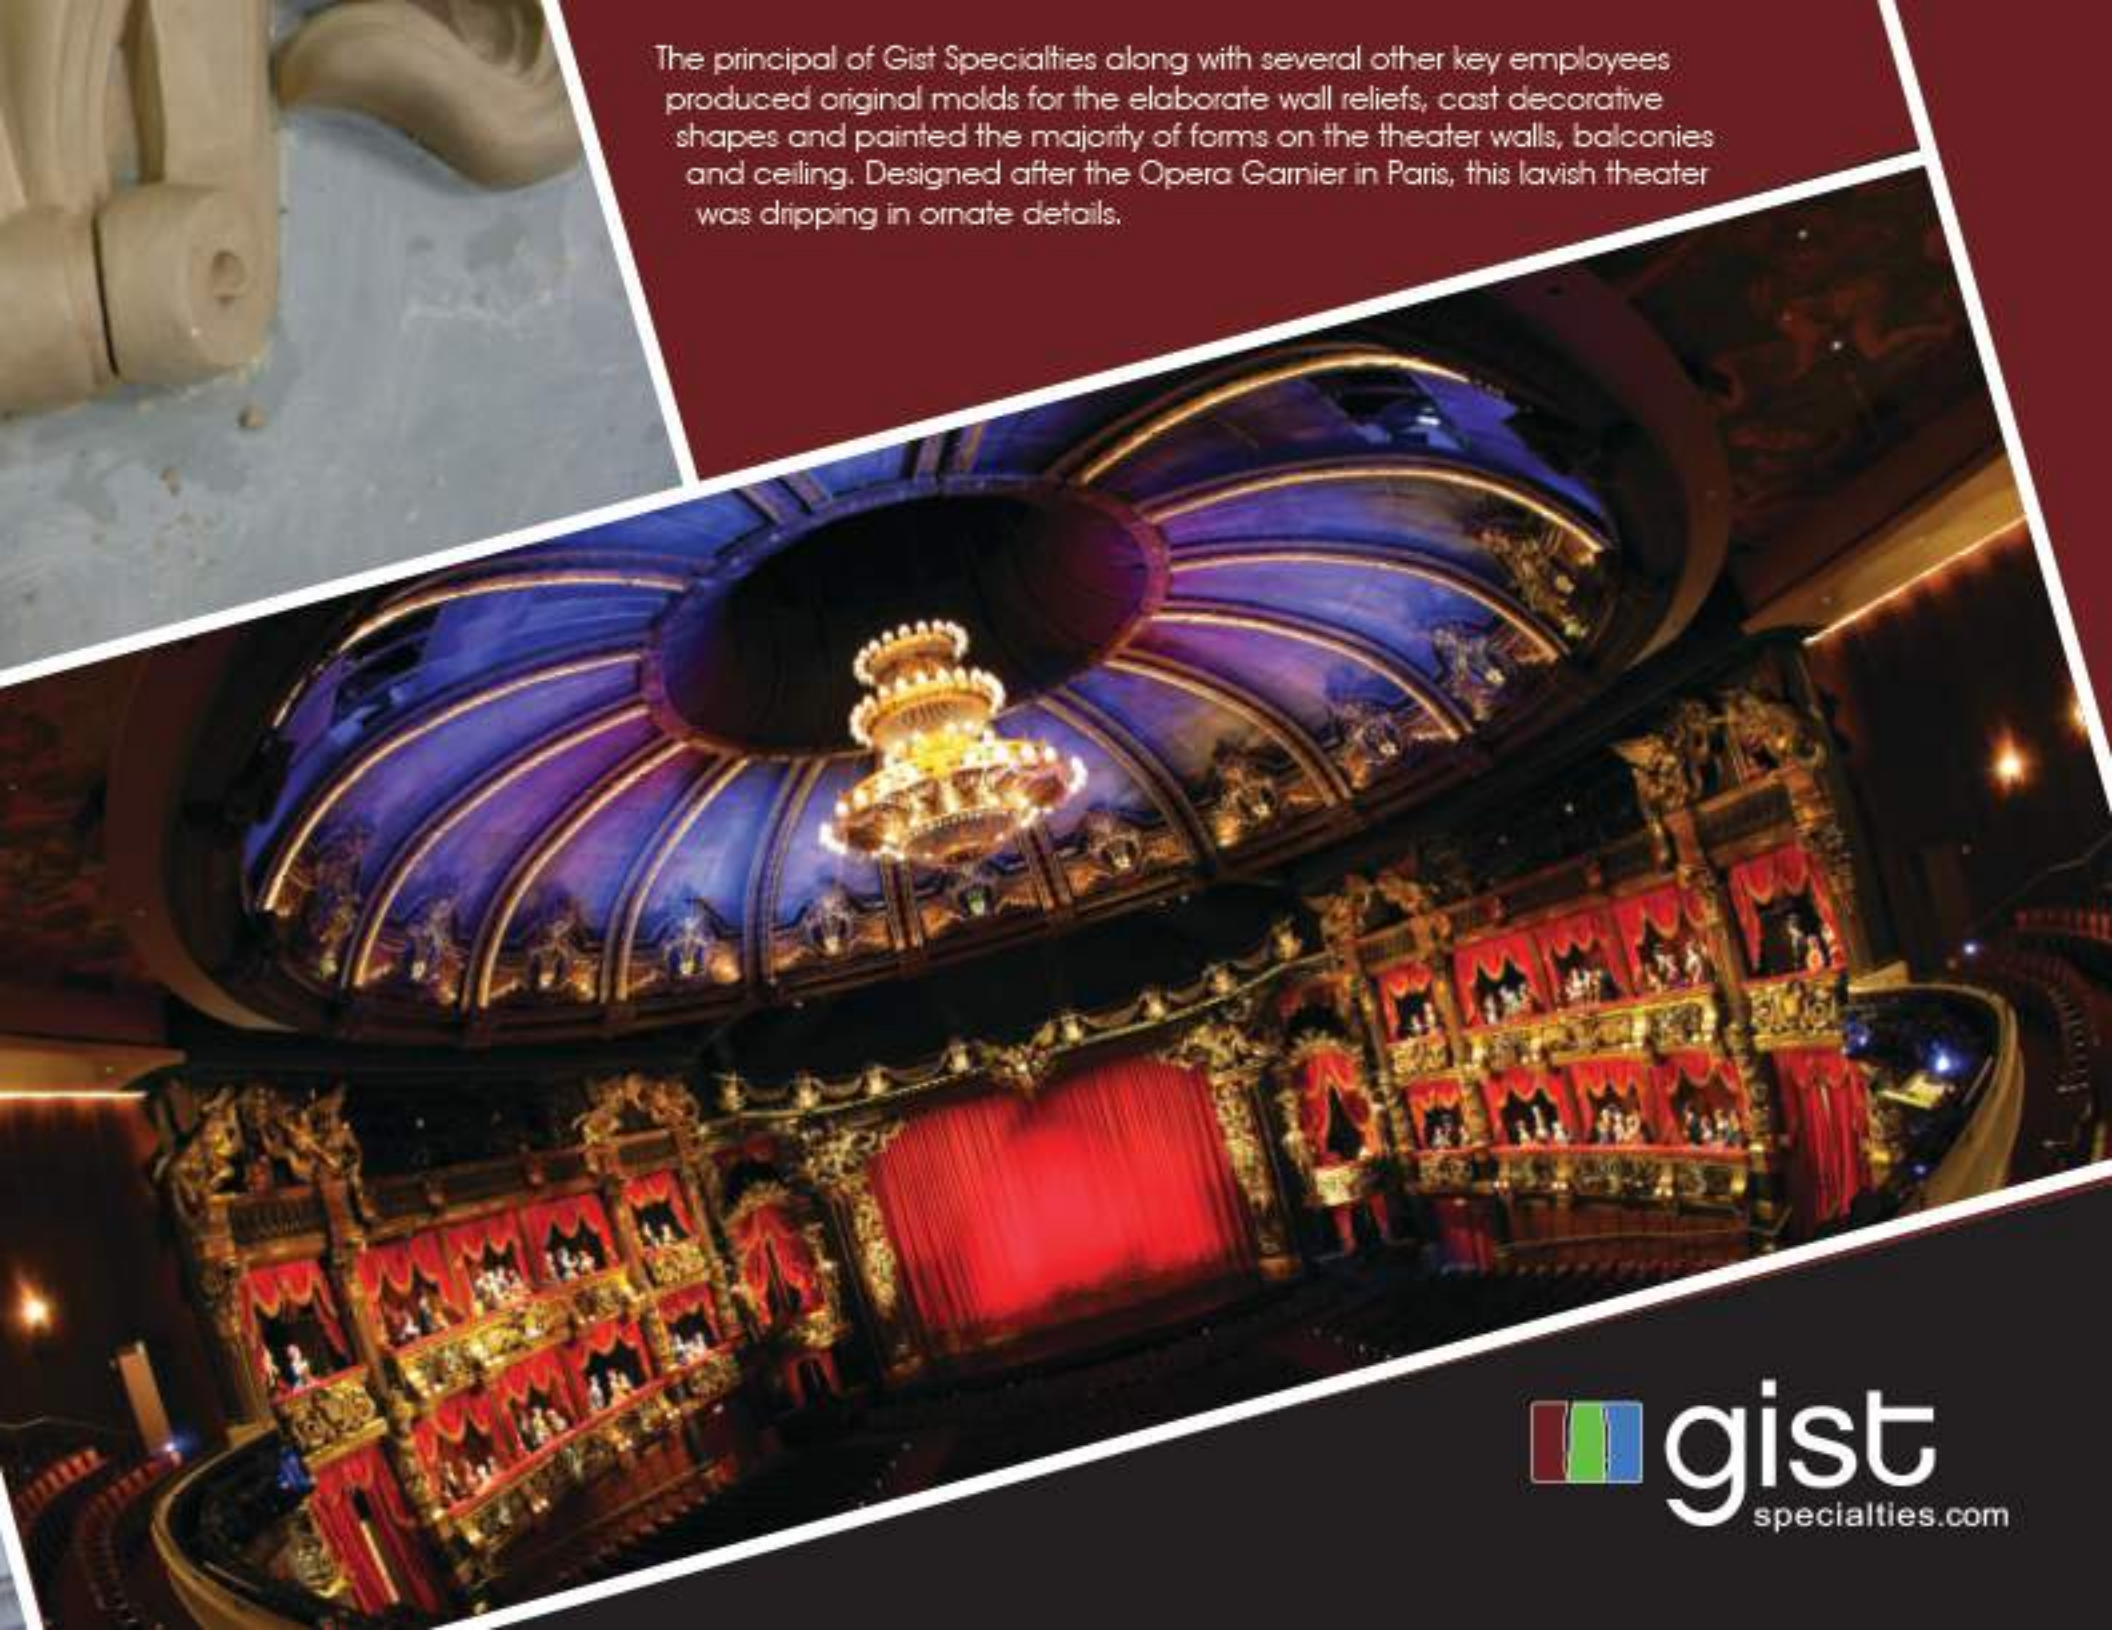

We created all of the custom, glass table tops and built the rounded benches from millwork and upholstery. We also created the bar wall fascia out of gypsum instead of fiberglass and then painted it with auto-finish.

Phantom of the Opera Theater
Venetian Hotel

The principal of Gist Specialties along with several other key employees produced original molds for the elaborate wall reliefs, cast decorative shapes and painted the majority of forms on the theater walls, balconies and ceiling. Designed after the Opera Garnier in Paris, this lavish theater was dripping in ornate details.
