We Build Statements.

The imagination has no boundaries. And neither do our builders at Gist Specialties. Let us help you create a bold statement and rise above the ordinary. At Gist Specialties if you can dream it, we can build it. There is no limit to the sky our artisans work under. We proudly turn conceptual fantasies into artistic reality.

No project is too big or too small. We use a myriad of materials to create custom, themed fabrications for our one-of-a-kind projects. We build architectural elements for resorts, casinos, restaurants, clubs, museums and retail environments, however our reach is endless. No detail is too intricate. No scale too grand. We pride ourselves on fulfilling our customers' wildest expectations and go to great lengths to bring their unique visions to life.

We specialize in:

Architectural / Structural

Metal Fabrication

LINE-X Spray Foam and Hard Coating

Fiberglass Fabrication

Automotive and Faux Painting

CNC Cutting

Sculpting

Millwork

The Gist artisans use a variety of materials such as:

- Fiberglass
- Natural and Cast Stone
- Steel
- Aluminum
- Wood

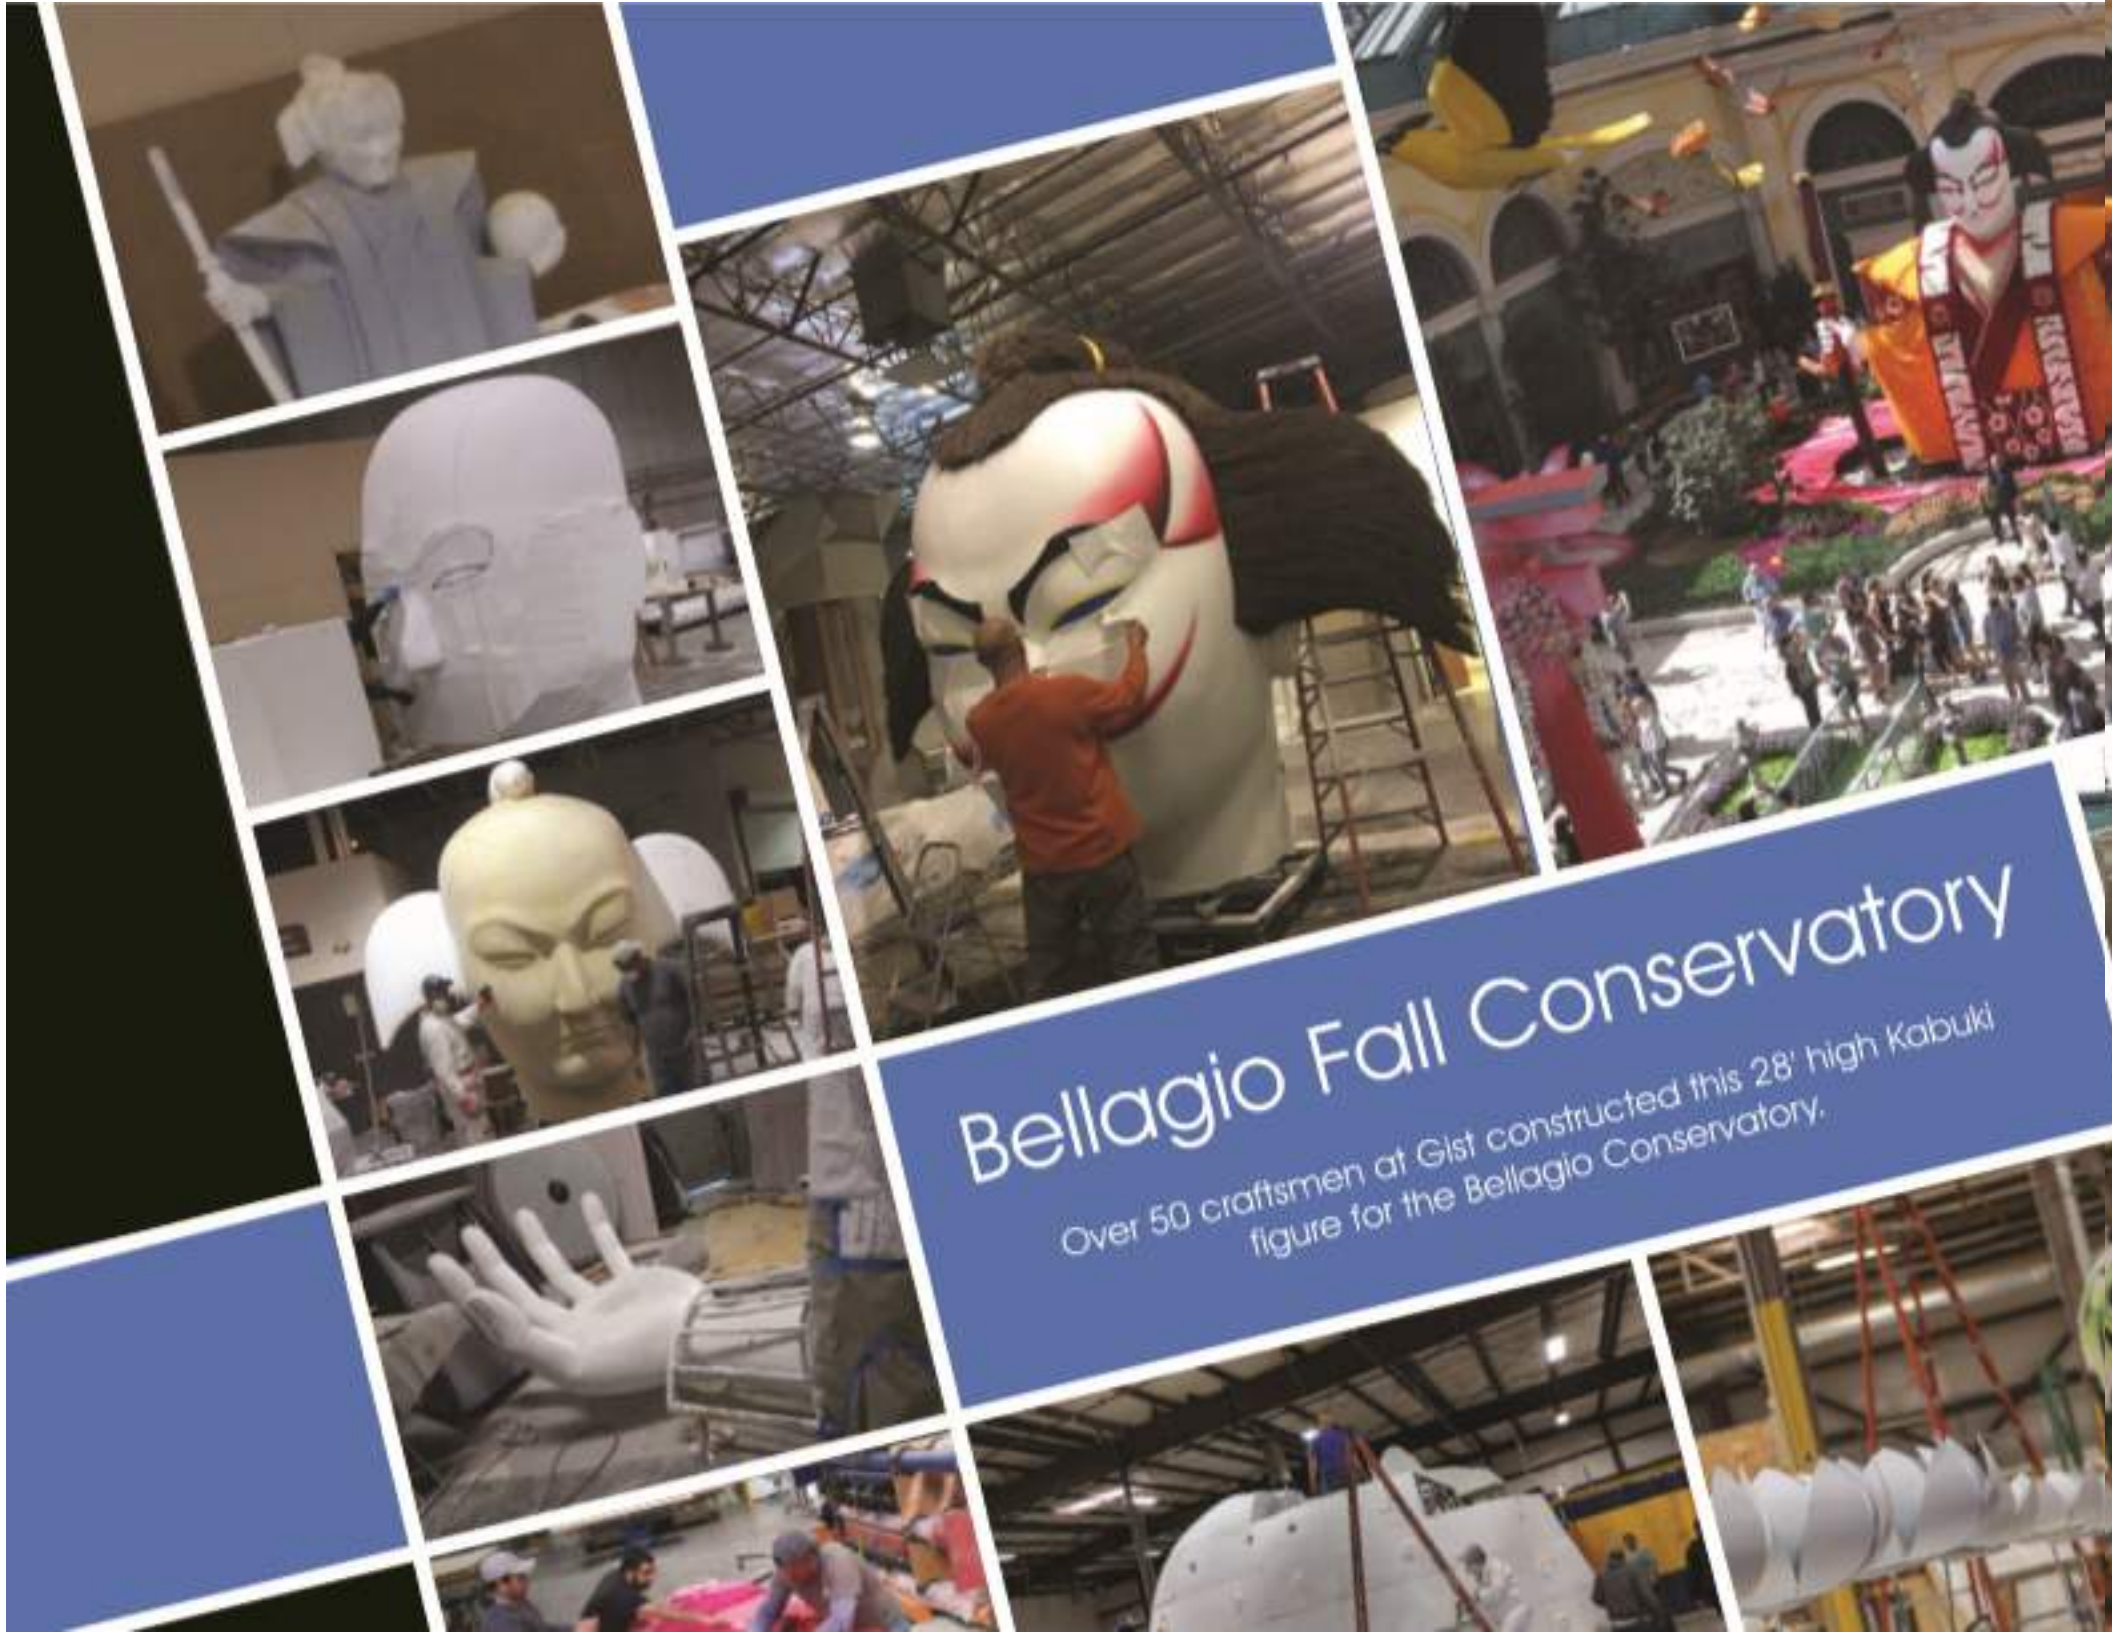

If you can dream it,
we can build it.

Electric Daisy Carnival

EDC - Insomniac

Gist produced the largest new stage for The 2017 Electric Daisy Carnival (EDC). Total size was 100' high by 380' wide. We connected 70' high large screen towers on either side adding another 140' in width. In addition to the flames were numerous spouting fountains along the entire front of the stage named Kinetic Gaia. 406,000 people attended EDC over 3 nights.

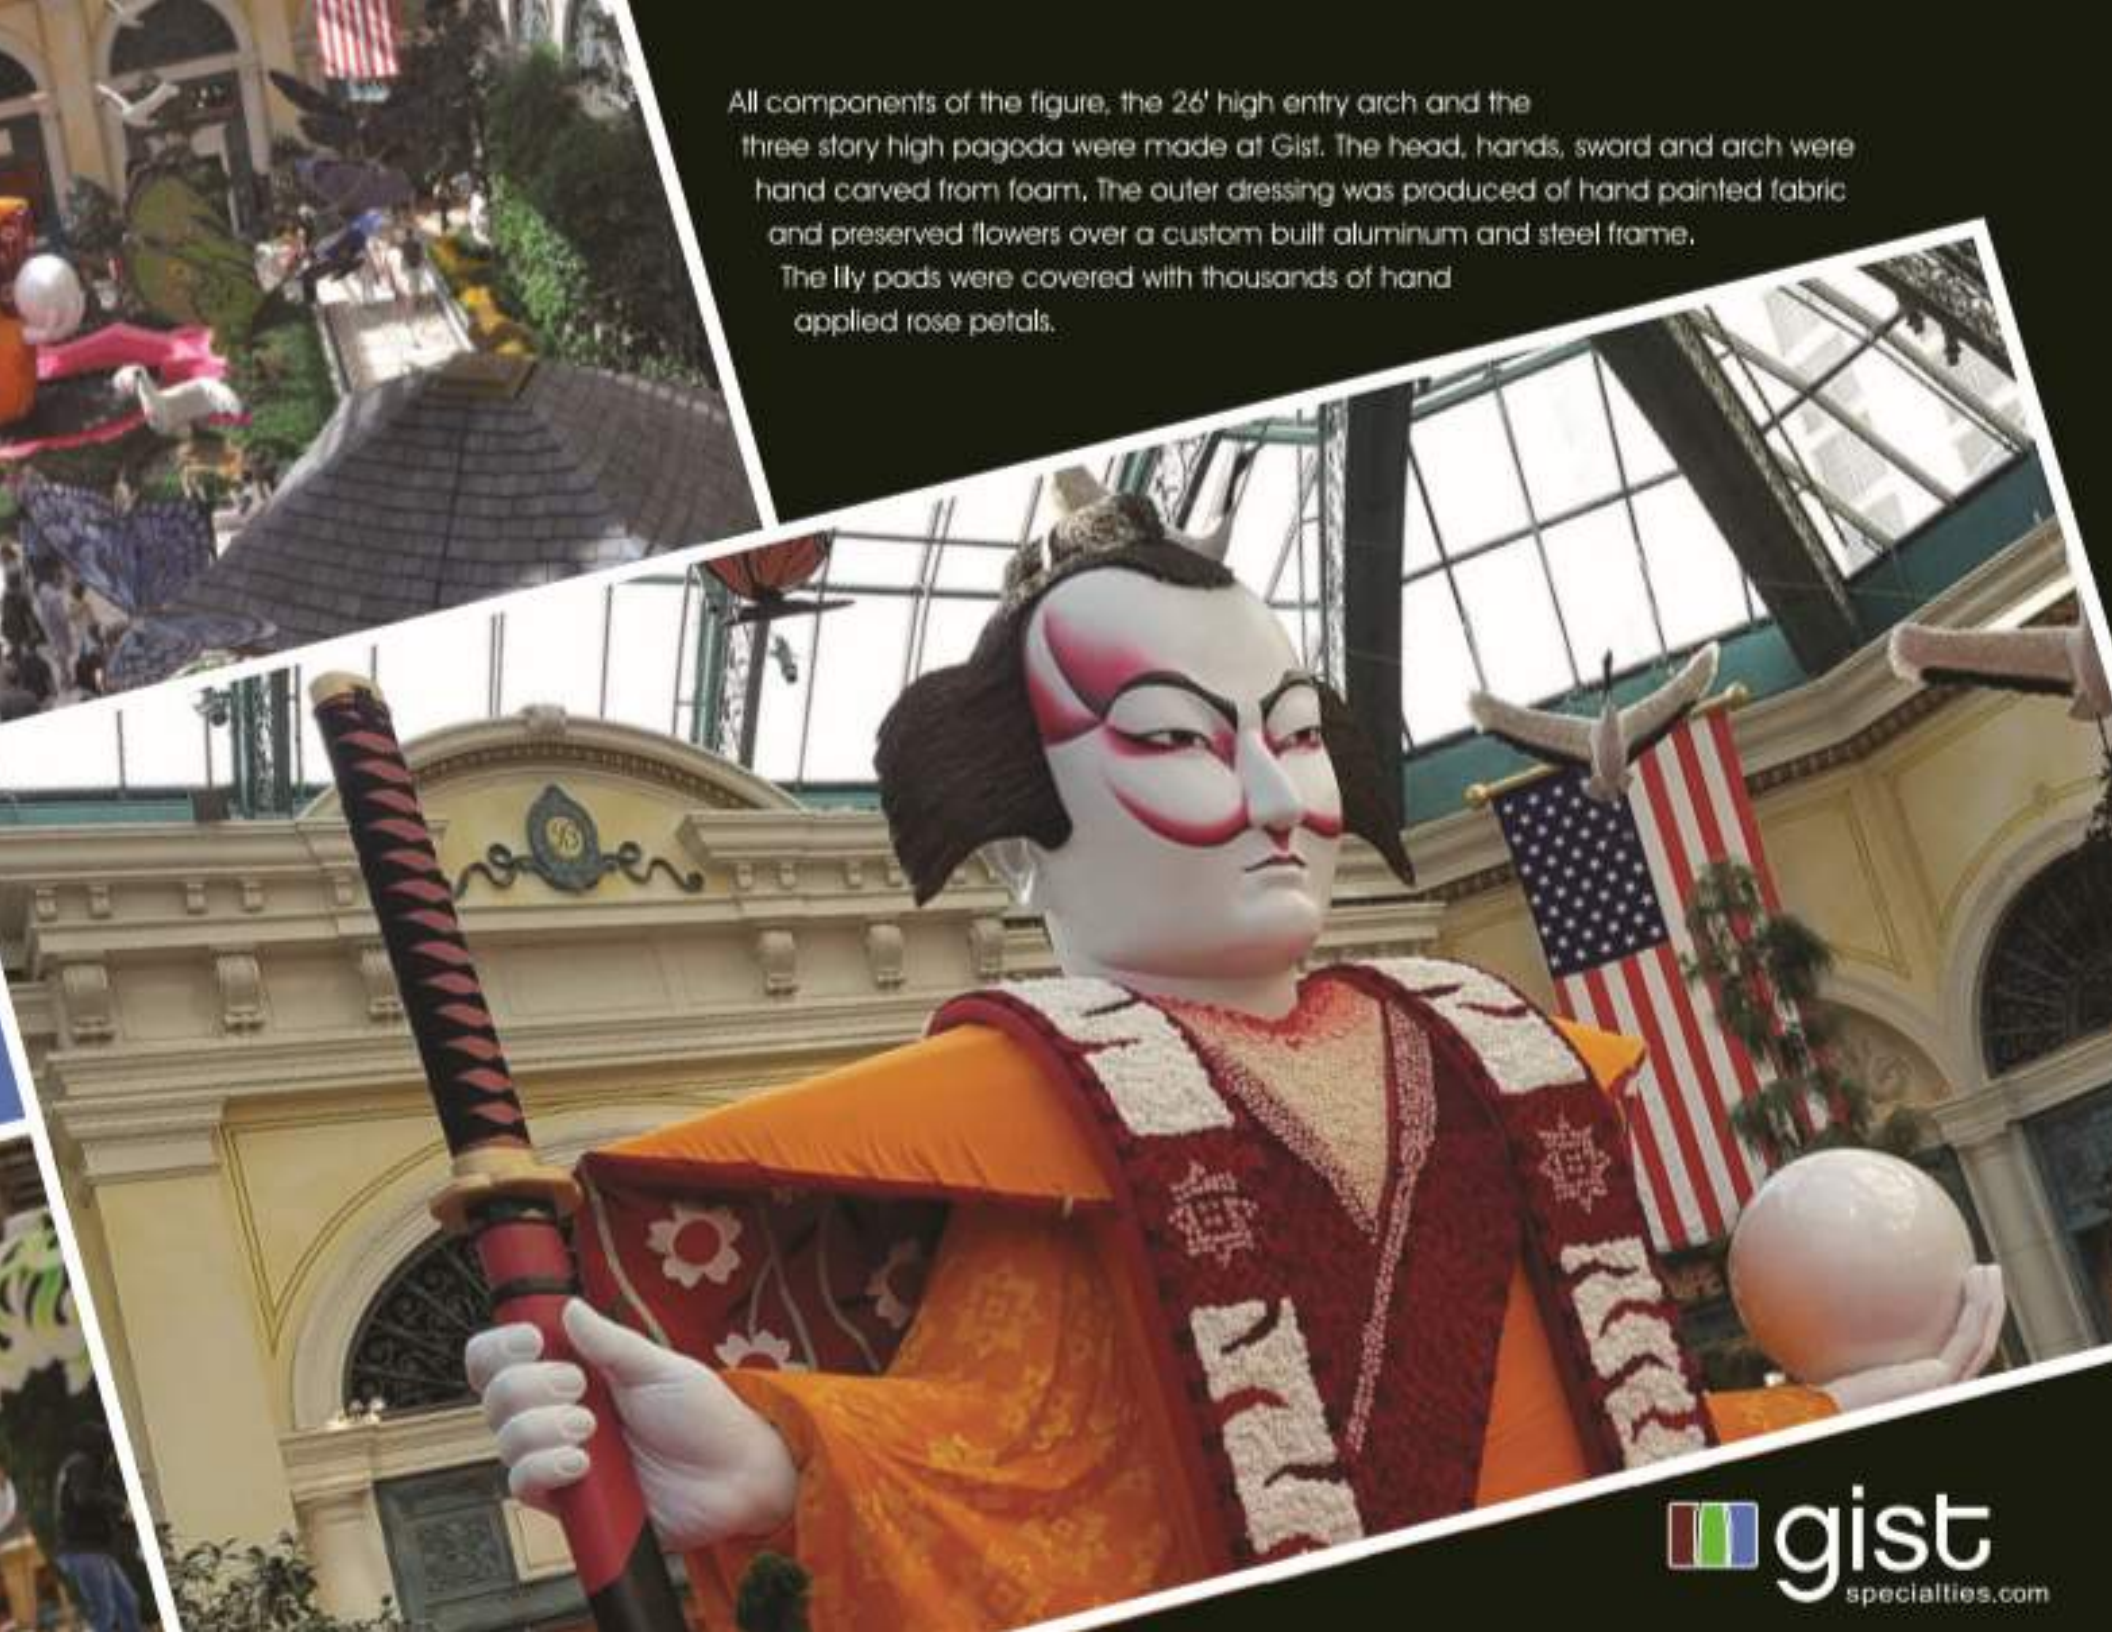

Bellagio Fall Conservatory

Over 50 craftsmen at Gist constructed this 28' high Kabuki figure for the Bellagio Conservatory.

All components of the figure, the 26' high entry arch and the three story high pagoda were made at Gist. The head, hands, sword and arch were hand carved from foam. The outer dressing was produced of hand painted fabric and preserved flowers over a custom built aluminum and steel frame. The lily pads were covered with thousands of hand applied rose petals.

Our team of artisans

Engineering, welding, sculpting, painting...
Building the Bellagio's vision.

Bellagio Conservatory 2018
Japanese Spring Exhibit

The mystical woman rises 26' out of water with a waterfall cascading from her hair and hands. Metal welded lotus flowers decorate the pond. Hand painted, 16' tall vases line the edges of the pool and hand sculpted and painted 12-15' tall birds fly overhead while flickering hand painted lanterns dangle above.

We Build STATEMENTS.

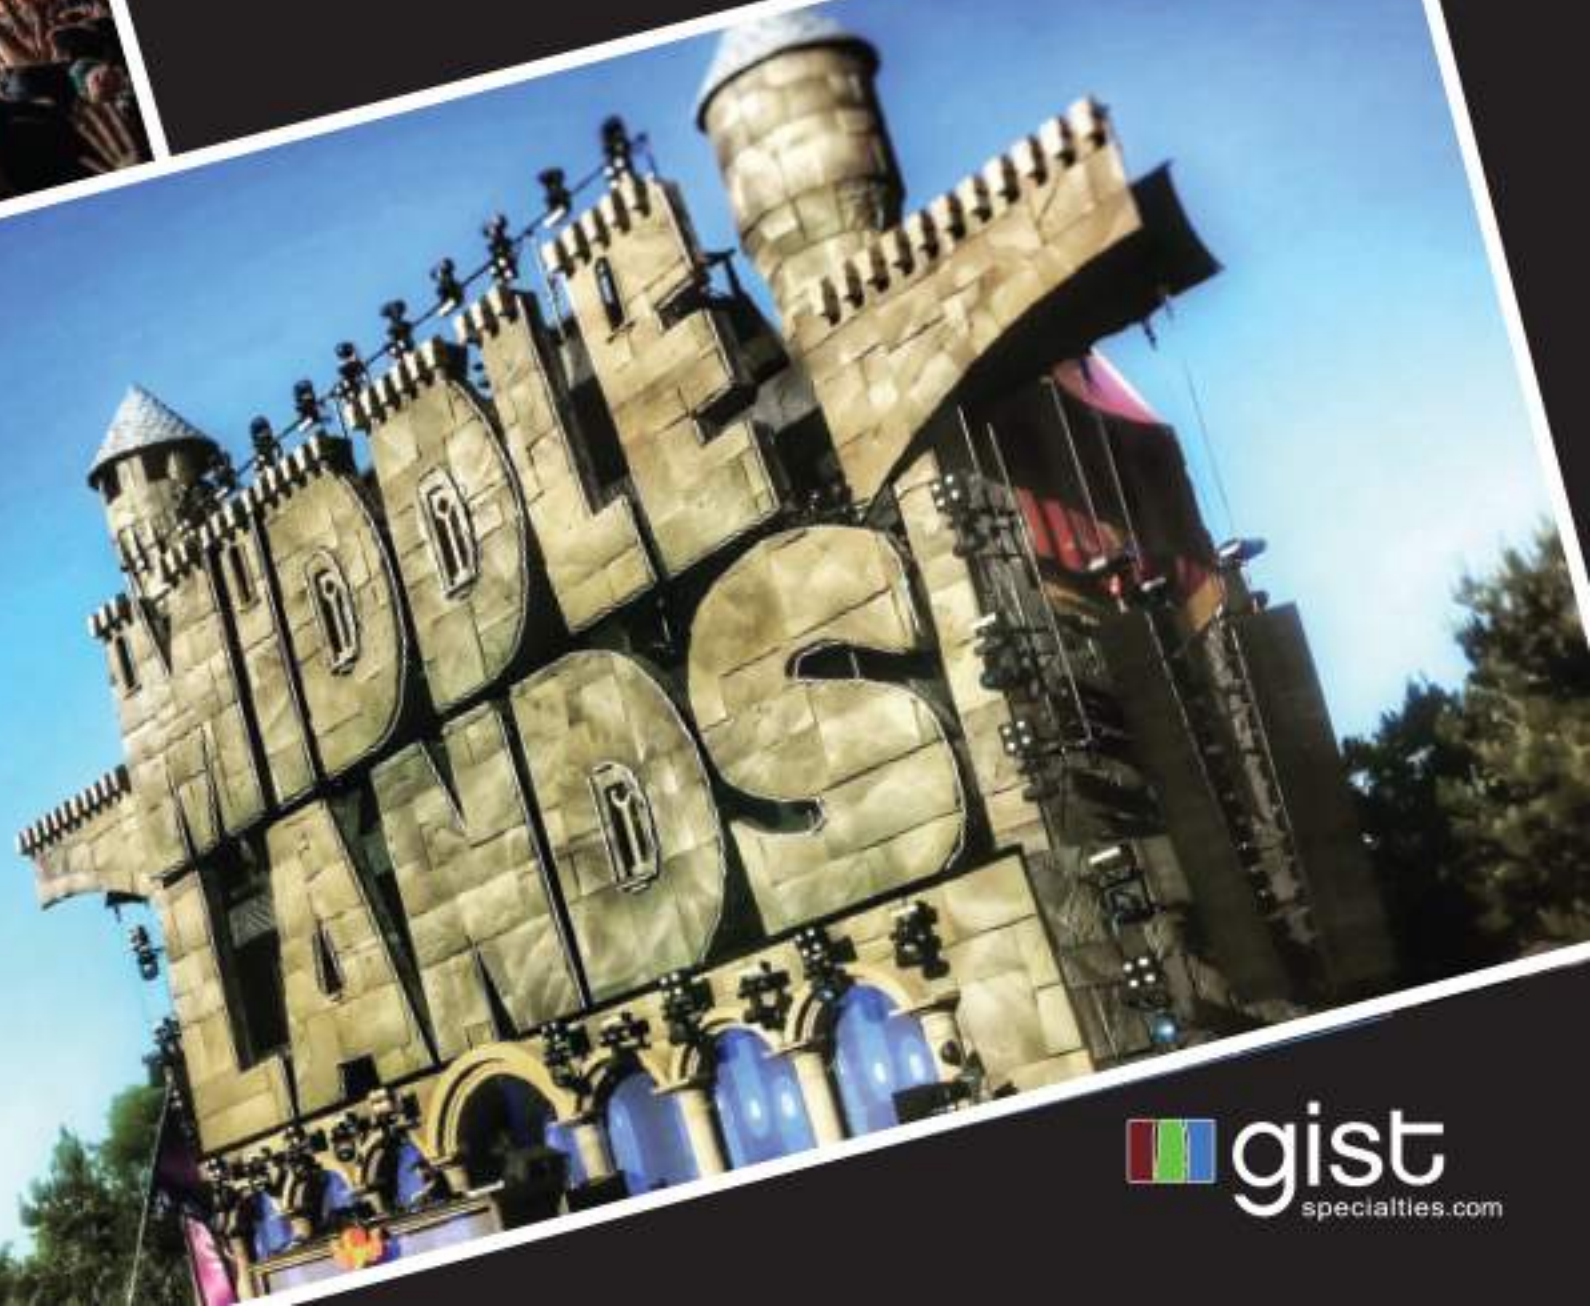

BASSPOD Stage for EDC 2015

Gist Specialties was tasked with engineering and fabricating the very intricate BassPod stage for EDC in 2015. Over 450 pieces were assembled for this set – a complex task that was completed in under six weeks. The LA Weekly named this the “Best Stage” at EDC.

Middlelands, Renaissance Festival
Todd Mission, TX

We built two massive stages produced for the Midlands Renaissance Festival. Over 69' high x 80' wide x 40' deep fabricated of wood and aluminum framing sections with sculpted foam "stone" facade and quick release cheeseborough clamps for assembly and dismantle. All letters were outlined with LED lighting for nighttime effects.

Basscon DJ Booth
Wasteland

BASSCON Wasteland DJ Booth

We produced this 18' tall shark head DJ booth for a BASSCON concert in Southern California. The shark head was hand carved in sections, aluminum reinforced and airbrush painted in our shop prior to shipping.

Yes! We Built that too!

Craftsmanship

Our talented engineering and design team can take a design concept and turn it into a final product for fabrication.

Vacuum Forming

Logistics & Installation

CAD Design & Engineering:

Gist Specialties has the capabilities to integrate, prototype and engineer to your required specifications through our full service fabrication shop. Our experts will take on your fabrication challenge using their broad experience and attention to detail.

Welding & Metalwork:

Gist Specialties offers TIG and MIG welding. This allows our craftsmen to weld aluminum, stainless and mild steel allowing us to fabricate any structural configuration. Our in-house CNC machines and high-definition plasma cutter gives us great precision and a low cost for our clients.

CNC & High Def Plasma:

Our CNC machines allow us to fabricate the most accurate products possible and offer any size imaginable. We have in house:

- 5-Axis CNC Router Machine
- 3-Axis CNC Router Machine
- High Definition Plasma Cutter
- CNC Hotwire

Vacuum Forming:

We also have the technology of vacuum forming where plastic is heated and then stretched onto a single-surface mold. This process can be used to form plastic into permanent objects and reusable molds.

Fiberglass Production:

Our expertise in fiberglass production allows us to create unique and complex structures that will stand up to corrosion and harsh environments. Fiberglass is perfect for constructing prototypes and designing custom, lightweight objects.

Spray Foam & Hard Coating:

We proudly use LINE-X hard coating for maximum strength and durability.

In-House Printing & Graphic Design:

In addition to building fabrications, Gist also offers state-of-the-art technologies for sign and scenic arts with the traditional applications. We can create computer cut vinyl, custom lettering, window lettering, vehicle wraps, storefront signs, backlit signs and many more possibilities to brand your image. Our in-house printer extends your vision into print and beyond.

Logistics & Installation:

We take our services one step further by transporting and supervising our scenic fabrication at our client's location. The Gist team has years of experience in rigging and our methods are proven to save time and money.

Millwork:

Our experience and expertise in millwork allows us to create designs ranging from simple to intricately sophisticated. Our craftsmen specialize in all areas of high-end finished carpentry and commercial millwork to bring your vision to life.

Fabric & Soft Goods:

If your creation calls for fabric, sewing and soft goods, we can build it for you. We have a veteran team of sewing experts who can create your vision at any size or scale. We use quality fabrics and go to great lengths to ensure our clients ideas are realized.

Paint & Finish:

We offer a variety of finishes including:

- High level automotive finishes
- Faux finishes
- Scenic finishes
- Fine art painting
- Airbrushing
- And many others
